

## **ITC LAB #12-B**

### **LAB TASK**

Write a python program that display the menu of restaurant. Ask the user to choose the item from the menu list i-e Espresso, over Ice , fusion etc. let's assume user have selected over ice option show the menu along with the prices for regular as well as large. Ask for the item name, size, and quantity. After that your program should ask again choose the item from the menu list 1-e Espresso, over Ice , fusion etc. and keep choosing until user press N or enter no. once user done with the menu display the total bill that includes the dish name, price and tax along with service charge. Also write the final bill in bill.txt

Menu is on next page.
