

## ITC LAB #09-C

### LAB TASK

1. Create a list which contains the first three odd positive integers and a list b which contains the first three even positive integers.

**a= [1, 3, 5]**

**b= [2, 4, 6]**

- Create a new list c which combines the numbers from both lists (order is unimportant).
- Find the minimum value in list c (Donot use built-in function)
- Insert fourth element in list c 42
- Append 7, 8 and 9 to the end of c.
- Print the first three elements of c.
- Print the last element of b without using its length.
- Print the length of a

2. Write a Python Function to find the list of words that are longer than n from a given list of words.

---

```
Enter Sentence:Hello, Welcome to Programming Fundamental Lab
n< 4
['Hello,', 'Welcome', 'Programming', 'Fundamental']
```
